Press Release, For Immediate Release September 9, 2009

Sparta, New Jersey: High Point Solutions has been awarded the prestigious Gold certification from Cisco systems for its outstanding levels of customer satisfaction, training, support and specialization. The Certification recognizes High Point's expert level of achievement for advanced competencies in Routing and Switching, Security Solutions, Wireless, Unified Communication, and Data Center. Gold Certified Partners are considered extensions of Cisco's support team with expertise in virtually every aspect of network planning, design and implementation as well as network operation and optimization.

"Gold Partner status is only awarded to partners who demonstrate in-depth technology skills and a proven track record of customer success in supporting Cisco solutions. We appreciate the recognition of our long-time partnership with Cisco and most importantly the support of our loyal customers," said Thomas Mendiburu, Cofounder.

This achievement is the result of High Point's continuous commitment to extensive training in Cisco advanced technologies, maintaining efficient customer support services, attaining advanced technical specializations, and consistently attaining high customer satisfaction ratings.

"High Point's continued growth is due to our successful strategic partnerships with Cisco, EMC, VMWare and other quality IT providers," said President, Michael Mendiburu. "Our customers benefit from collaboration that allows advanced technologies to be implemented that fit their specific business need. Our goal is make our clients' job easier. High Point achieves this by being a trustworthy, reliable tool for customers to utilize."
